- B. The Commission reviewed the ISO application and, by Order No. G-5-96, approved Rate Schedule 1848 - RTP on an interim basis effective January 31, 1996; and
- C. On January 25, 1996 B.C. Hydro applied to the Commission for approval of a January 10, 1996 application by Sterling Pulp Chemicals Ltd. ("Sterling") for access to the RTP option with a 50 percent reduction in Customer Baseline Load, under the Load Retention criteria of the ISO application; and

NOW THEREFORE the Commission orders B.C. Hydro as follows:

Hydro January 25, 1996 application on behalf of Sterling for access to the RTP option with a 50 percent reduction in the Customer Baseline Load as provided for under Rate Schedule 1848 . This will result in a Customer Baseline Load for Sterling in the order of 25 MW.
- 2. The Commission will approve, subject to timely filing by B.C. Hydro, a Supplementary Agreement to Sterling's Electricity Supply Agreement that embodies a 50 percent reduction in Customer Baseline Load.
- 3. The approval of Rate Schedule 1848, and the RTP option, given by this Order will remain in effect on an interim basis for a period of up to one year from January 31, 1996 and is subject to adjustment following the Commission's hearing and Decision on B.C. Hydro's ISO application.
